

ECLIPSE STANDARD VALVE TRAIN SEGMENTS

Compact Modular Valve Train Assemblies

- Industry-best 5 business days to shipment on most assemblies.
- Industry-best 2 year warranty on entire valve train.
- Supported globally by Eclipse's world-class service team.

The Eclipse Standard Valve Train Segments are designed to install faster, operate safer and deliver proven reliability for global applications. Eclipse Standard Valve Train Segments are offered in the NFPA series with UL, CSA and FM approved components or in the EN 746-2 series utilizing CE marked components.

All Standard Valve Train Segments are available in nominal pipe sizes from 1/2" (25 mm) through 8" (200 mm). Threaded and flanged models are available depending on the pipe size specified.

For complete configured gas train assemblies that include options for strainers, regulators, and gauges, refer to Eclipse Catalog 790 documents.

Rigorously tested by strict factory procedures.

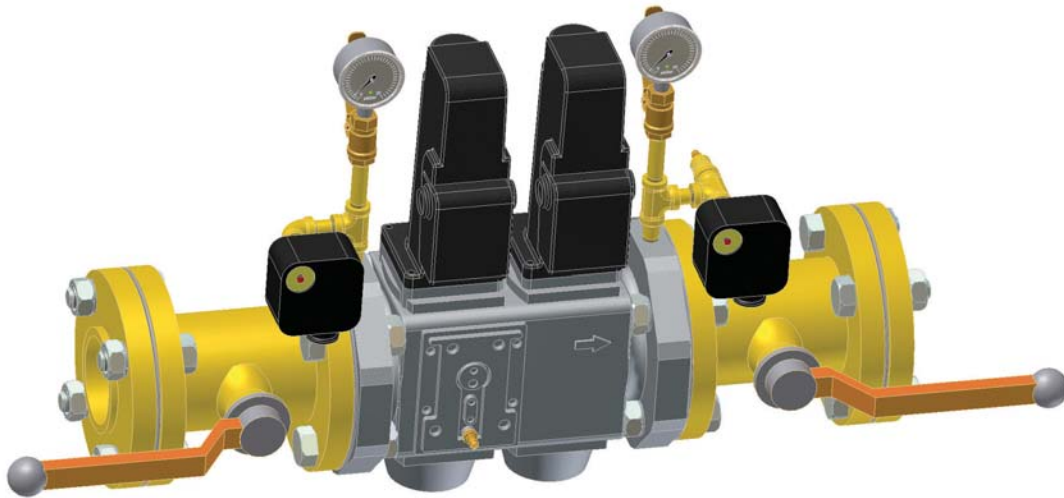

Wide range of sizes available for global applications.

These segments include:

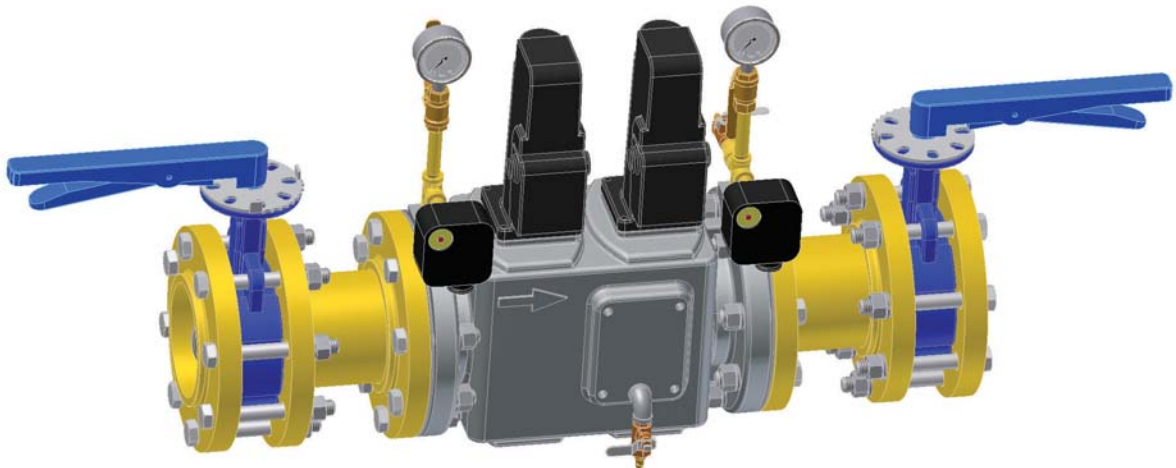

- Double safety shut off valves
- High and low gas pressure switches
- Permanent and ready means for leak testing
- Inlet and outlet manual isolation valves
- Connection ports with isolation valves for pressure measurements
- Note: Pressure gauges on all valve train segments are shown for reference and must be ordered separately

World Wide Applicability

Built to meet or exceed safety standards around the world

2.5 Inch CE Valve Train Segment

4 Inch NFPA Valve Train Segment

8 Inch CE Valve Train Segment
